DETAILED ACTION

In addition to the restriction requirement mailed March 9, 2005, a further subspecies (and sub sub sub species) restriction is required (see below).

Election/Restrictions

This application contains claims directed to the following patentably distinct sub-species

Sub 1) triangular (figure 3a, 4a, 5a)

Sub 2) symmetric butterfly (figure 3e)

Sub 3) asymmetric butterfly (fig.3f)

Sub 4) circular (original claim)

If applicant elects sub 2, a further sub sub species is required to be elected from the following group (it is noted that such embodiments of partial opening, full recessed opening, and partial flat, partial and full round bottoms *only* appear to be supported for the symmetric butterfly shape; triangular, asymmetric only seem to have support for full through hole and circular has not disclosure at all of a type of opening; if applicant believes they have support for the other shapes having the below opening features, support must be pointed out and a sub sub species elected):

Sub sub 1) figure 4n

Sub sub 2) figure 4o

Sub sub 3) figure 4p

Sub sub 4) figure 4q

Sub sub 5) figure 4r

Sub sub 6) figure 4s

Art Unit: 3738

In addition a further sub sub sub species is required to be elected from the following group:

Sub sub sub 1) substrate made with carbon power

Sub sub sub 2) substrate made with graphite

The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 3738

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CHERYL MILLER whose telephone number is (571)272-4755. The examiner can normally be reached on Monday-Friday 7:30am-5:00pm.
